

## ORGANIZATION

PSA-07 will be organized by the Surface Analysis Society of Japan and the Korean Vacuum Society with the following responsibilities;

### Organizing Committee

S. Tanuma (Chair : NIMS, Japan)  
K. Endo (Kanazawa Univ., Japan)  
Y. Fukuda (Shizuoka Univ., Japan)  
K. Goto (NIT, Japan)  
S. Ichimura (AIST, Japan)  
H. -J. Kang (Chungbuk Univ., Korea)  
K. Miura (HANTOK CHEMICALS Co., Korea)  
D. -W. Moon (KRISS, Korea)  
K. Yoshihara (ULVAC-PHI, Japan)

### Executive Committee

S. Hashimoto (Chair : JFE-TEC, Japan)  
K. -J. Kim (Vice-chair : KRISS, Korea)

### Program Committee

M. Suzuki (Chair : ULVAC-PHI, Japan)

### Editorial Committee

S. Fukushima (Chair : NIMS, Japan)

### International Advisory Board

D. R. Baer (Pacific Northwest Nat. Lab., USA)  
J. T. Grant (Dayton Univ., USA)  
A. Jablonski (Polish Academy of Science, Poland)  
L. Kövér (ATOMKI, Hungary)  
H. J. Mathieu (EPFL-DMX, Switzerland)  
C. J. Powell (NIST, USA)  
M. P. Seah (NPL, UK)  
S. Tougaard (Univ. Southern Denmark, Denmark)

## LOCATION & ACCESS

Kanazawa is located in the middle coast of Honshu (main) island facing Russia, China, and Korea, and is one of the old cities which has been preserving an old culture and view of Yedo-Era (17-19 century). Kanazawa is most famous for Kenrokuen Garden, one of the most celebrated gardens in Japan, and its autumn color is particularly extraordinary. Many kind of small museums in the city and nearby are also worth a visit. Kanazawa is also renowned for its crafts, such as the “japan”, i.e. “urushi” laquer, ware of fine art of gold (maki-e, shikki), the Kaga printed silk (Kaga-Yuzen), etc.

It takes about 4 or 6 hours from Narita, Chubu, or Kansai international air ports to Kanazawa by train. The direct flight from Seoul to Komatsu international air port, the nearest airport to Kanazawa, is also available, but the flight number is limited.

## CLIMATE

The climate of Kanazawa in this season is comfortable. The average temperature of this season is around 11 °C, and the average low and high temperatures of this season are 7 °C and 15 °C, respectively. And, in this season, it might be better for you to have an umbrella and to put on a coat.

*First Announcement  
and  
Call for Papers*

# 4th International Symposium on Practical Surface Analysis and 6th Korea-Japan International Symposium on Surface Analysis

**November 25, Sunday - 28, Wednesday 2007**

**Ishikawa Ongakudo  
Kanazawa, Ishikawa, Japan**

*organized by*

**SAS** *Surface Analysis Society of Japan  
&  
The Korean Vacuum Society*
